Preface *Get the Noss book,* a teacher told me years ago. It was good advice then, and I hope it will continue to be good advice. Now in its thirteenth edition, *A History of the World's Religions* has a history of its own. John Noss spent more than a decade researching and writing the first edition, published in 1949 as *Man's Religions*. His much younger brother, David, played a small part, typing one of the chapters. That was not the end of David's association with the book. When John died, in 1980, the seventh edition was in preparation. David had already consulted on previous editions, and the seventh included his name on the title page. Through subsequent editions he reworked prose, emended and added material, and broadened the scope of the book to give special attention to the role of religion in social conflicts and international tension. By the tenth edition the publisher convinced him the book had become *his,* so his name alone would be on the title page. I was relieved when David told me his first intention upon taking on this book was *not* to mess it up. *I* feel the same way. So it is appropriate to be mindful of the book's purpose, i.e., to be a one-volume history of religion, directed to teachers and students. As David expressed it in the most recent

editions:

My elder brother, John B. Noss, spent ten years preparing the first (1949) edition of this book. At that time he found that most publications in the field tended to focus on the biographies of the founders and then jumped to comparing and evaluating their contemporary practices. His preface to the first edition spoke of two special needs to be met: the first was to include descriptive and interpretative details from the original source materials; and second to bridge the interval between the founding of religions and their present state. *Italics mine.*

Those who have used successive editions will recognize an increasing attentiveness to those needs. Primary source materials are not spliced in as undigested chunks but carefully introduced with interpretative introductions. As color-highlighted quotations, primary sources gain even more of the prominence they deserve. Key quotations are highlighted in color-framed brackets. Illustrations now play a larger part: in addition to samples of classic art and architecture, new photographs furnish more samples from pop art, depictions of ceremonial regalia, explanations of ritual practices, and scenes of believer engagement toward social betterment. Extended teaching captions go beyond perfunctory identifications of the subject.

Alive

By Dapperdobbs

A truly excellent, penetrating, work. David Noss provides an opportunity for the reader to personally shake hands with each major religion: each is introduced with unobtrusive eloquence and exactitude; each is treated with the utmost respect; and so is the reader accorded this same, unpretentious, sacred reverence. One might gain the impression that a very sane and learned scholar in each religion covered is laying out for you the fundamentals and origins of his beliefs and faith, in a non-proselytizing way, for you to see. Excellent!

Outstanding textbook

By Watson McFestus

I was looking for an inexpensive but quality book that explained the origin, history and basic beliefs of the worlds religions for my home library. I wanted something that had more than just the major 5 or 6 religions. At the huge used book store I frequent, this title was clearly the best. I purchased the 9th edition for \$7.00. I find myself browsing through parts of it quite often. One of the best buys I've ever had.

Good text

By FaeGreta

Another good text from a top notch class I decided to keep for reference. The class did use supplemental materials but this is a good overall source for info on the historic origins and development of world religions.
