Supplemental Textbook

By Living In SoCal

Purchased this for the CCS exam as my course did not cover anything of the health records nature. It's a relatively thick book, thicker than I was led to believe by co-instructor. 4 week crash course so wish me luck! Book seems pretty straight-forward.

Health Records book from AHIMA equals trusted material

By RealWookieDonut

I bought this for the Health Records class at the University of Cincinnati, it was the required textbook. It is written by the HIM leader AHIMA, so you can trust the information inside the text. The layout of the material is easy to follow and even though it is a thick book (744 pages) it isn't cumbersome to study with. The size of the print inside is large enough so you don't have to squint your eyes, not like some textbooks I have encountered. I plan on keeping it to study for the RHIT exam and as a source for my future classes.
