Review

"This book has become the go-to reference for anyone interested in international migration, offering a comprehensive assessment of theories, data, patterns, and processes of immigration around the world. The fifth edition offers a fresh look at developments in the first decade of the 21st century. It belongs on the bookshelf of any serious student of immigration today." - Douglas S. Massey, Princeton University "The Age of Migration remains the only authoritative text on significant social, political, economic, and cultural trends in the field. The fifth edition is vital to understanding the rapidly transforming processes of international migration. More than ever, this book is de rigueur for introductory and advanced courses." - Immanuel Ness, Brooklyn College, City University of New York "I have relied on this book both as a resource for my own research and a text for my upper-division undergraduate and graduate courses on the politics of immigration. The fifth edition continues the excellent coverage of migration theories and history, the politics of immigration, and issues such as race and ethnicity, while bringing in new material on topics like the impact of climate change." Terri E. Givens, University of Texas at Austin "The Age of Migration, Fifth Edition, once again offers a comprehensive, creative roadmap to the migration field. The authors' historical perspective, regional focus, and policy-orientated approach make this an invaluable resource." - Peggy Levitt, Wellesley College Praise for previous editions: "Widely and deservedly praised as a major achievement ... [the authors] have their own distinctive model of the migratory process but manage at the same time to cover almost every major theme of current migration studies." - Rainer Baubock, Ethnic and Racial Studies "An impressive achievement. The empirical detail is striking, the historical overview comprehensive and the theoretical overview clear and easy to follow even without prior sophisticated knowledge of the theories covered." - Helena Ekelund, Journal of Contemporary Research

THE AGE OF MIGRATION: INTERNATIONAL POPULATION MOVEMENTS IN THE MODERN WORLD BY STEPHEN CASTLES, HEIN DE HAAS, MARK J. MILLER PDF

International migration is a central feature of the contemporary world. The fifth edition of this leading text has been substantially revised to provide an up-to-date and comprehensive assessment of the nature, extent and dimensions of international population movements, as well as of their consequences. Taking full account of the latest developments, including the impact of the global economic crisis and the relationship of globalization to migration, this text firmly contextualizes the main issues, theories and history that contribute to the field.

This latest edition has extensive coverage of regional case studies, as well as additional material that examines the effect of climate change on migration. The book's companion website helps to consolidate learning by providing additional resources, including further case studies, links to external web-pages and a web-only chapter. It can be accessed at: www.age-of-migration.com.

Castles' 5th edition is a winner

By Susan Gzesh

Once again, in the 5th edition, Stephen Castles and his co-authors give a brilliant, global overview of patterns of migration and their underlying causes. This is both an excellent text for undergraduate or graduate students and a handy reference for scholars in the field. Written in a clear and well-organized manner, this book not only describes the causes and impacts of migration today but also places contemporary trends in their historical context.

Not static but evolutionary across the global outpor...

By Coniac

This is a prerequisite to understanding how mental capacities of different disciplines announces its complexities and differences in an attempt to support innovative means to solutions. We can embrace change or lay dormant to never be awoken to what is happening across our borders. What is happening today.

We can grow or let life move with us fighting for a piece of the pie. With this under Castles & Miller (2009), refreshes the integrity of history and political indemnity of all disciplines to focus and to come together to teach and move us beyond average intelligence.

Great book for students of comparative migration theory

By MaryAlecia K. Briggs

My main complaint about the field, though, is the lack of study of migration to and within the MENA region. This book does touch upon the complexities of that area to a limited extent. This book provides a good basis for understanding the focus of different fields as they consider the study of migration. The writing is very accessible and the references to source documents used to present information very helpful for further research.
