Best Trading "Psychology" book of ALL TIME...

By QCD

I had to read this book SEVERAL times before I "got it." When I finally did, my reaction was, "That's It?!?!" The answer is SO SIMPLE. The implementation may be difficult for you but the ANSWER itself is quite SIMPLE...

This is probably the best book on the REQUIRED psychology for trading that I have ever read. If you don't like it, it may be "too simple" for you and the message may go over your head as "unimportant." Read it again. Think about EVERY paragraph. "Am I doing that?" "Do I feel that way?" "Is this true for me yet?"

Worth the read

By Jack

This book won't provide nitty-gritty tips, but will give the reader plenty to think about when it comes to their own trading. Definitely worth reading. In fact, I printed out the following advice from the book just to keep reminding myself of the simple truths of trading: Never add to a loser; add to a winner only; let profits run; cut losses fast; don't pick tops; don't pick bottoms; go with the trend. Yes, these are basic things, but as the book points out, it's important to review the basics every once in a while to keep from straying off the correct path.

It is the all-time 2nd best book for daytraders.

By Jeff

I train daytraders for a living, I make them read 2 books before they start: 'Reminiscences of a Stock Operator' and this book 'Zen in the Markets.' I quote it almost daily when instructing traders - Trade what you see, not what you think. It is a very quick read.

It is NOT for long-term stock investors, anyone reading it for those purposes will be disappointed and give it a negative review about how it downplays fundamentals, charts, technical patterns, and such. Short-term (like 1-2 minute in a trade) daytraders and pit traders are the ones who swear by this book, as I do. I traded on the floor of the exchange and still make my living in the quick in-and-out daytrading world, and for people like me this book is a must have.
